

Adjustable Hose Clamps

Hose clamps are the plumber's choice to do the job right. They are commonly used in plumbing and underground applications where corrosion resistance is important. These clamps are also perfect for common household and automotive applications.

Features:

- Corrosion-resistant 300 series stainless steel
- Good for plumbing, home, auto, and light industrial applications
- High-grade stainless steel for maximum corrosion resistance
- Clean punch and rectangular perforations hold strong and connect easily

Approvals:

- IAPMO Research and Testing certified

Installation:

1. Select the proper size clamp for the intended use and application. Match the size of the clamp to the diameter of the hose on which it is going to be attached.
2. Open the clamp using a screwdriver or hex head driver by turning the screw counter clockwise until the clamp can be slipped over the end of the hose. Insert the hose onto the fitting, it should be a snug fit. Position the clamp over the fitting end inserted into the hose, leaving a minimum of 1/4" of hose showing between the clamp and the end of the hose.
3. Tighten the hose clamp screw being careful not to overtighten.

Rated Ultimate Torque: #4 & #5 Mini Clamps is 15in.lbs. min. (1.7Nm)

Recommended Installation Torque: 10-12in.lbs. (1.1-1.4Nm)

Rated Ultimate Torque: #6 and larger Clamps is 60in.lbs. min. (6.8Nm)

Recommended Installation Torque: 35-45in.lbs (3.96-4.52Nm)
