9th Edition

APOLLO

by  MOSACK GROUP

On April 24, 1928, American Lubricator and Brass Co. and Sterling & Skinner Manufacturing Co., two established Detroit-based manufacturers of brass valves and fittings, merged and adopted a new name, Consolidated Brass Company.

The company relocated to Charlotte, NC in 1955. It expanded to Pageland, SC in 1968 and to Conway, SC in 1982. The name of the company was changed to Consolidated Valve Industries in 1975 and Conbraco Industries, Inc. on July 28, 1977.

In 2018, Glenn Mosack broke out on his own and started The Mosack Group, Inc. by acquiring the retail division of Conbraco Industries, Inc. In 2020, The Mosack Group Inc. completed construction on a 126,000 sq. ft. corporate headquarters and warehouse in Mint Hill, NC. The headquarters expanded in 2022 by adding an additional 106,000 sq. ft. of warehouse and manufacturing space. In 2023 a Calgary-based company, HeatLink, was acquired by The Mosack Group, Inc. HeatLink is a multi-system supplier of potable water and radiant hydronic heating/cooling and snow melt systems.

Today, The Mosack Group, Inc. is continually striving to be the premier solution for plumbing system connections.

Expansion PEX

PEX-A PIPE

PEX-A tubing is cross-linked, high-density polyethylene. All Apollo Expansion PEX is available in red, white and blue for easy identification of hot, cold, and main water lines. Apollo uses the high-pressure peroxide method of cross-linking which is also known as PEX-A.

Apollo Expansion PEX pipe is produced using the high-pressure peroxide method for cross-linked polyethylene (PEXa) in accordance with ASTM F876, F877, CSA B137.5 and PPI TR-3, and is certified to NSF 14/61 standards. Apollo Expansion PEX pipe also meets the requirements of ASTM F2023 for chlorine resistance. Apollo Expansion PEX pipe is manufactured using a quality management system which has been certified to the latest version of ISO 9001

Use of Apollo Expansion PEX pipe in heating systems requires corrosion protection and/or isolation by using a heat exchanger or non-ferrous components throughout the system.

Features

- Superior flexibility allows for fewer joints, thus reducing leak points
- Expandable and allows for "full flow"
- Less coil memory than traditional PEX pipe and resists the urge to remain coiled
- Compatible with both expansion and crimp, clamp or sleeve methods of joining
- Heat-repairable if kinked during installation
- Shape memory inherent in PEX-A tubing results in the shrinking of expanded pipe to normal size, creating strong, durable, and reliable ASTM F1960 fitting connections
- Maximum cross-linking increases flexibility and resistance to cracking
- Copper tube size dimensions (CTS)
- Available in red, blue, and white colors
- Approved for use with brass and poly alloy crimp fittings (ASTM F1960 and ASTM 1807)
- 25 year warranty

Standards / Certifications

- PEX 5106 - SDR 9
- cNSFus-pw
- cUPC
- Meets or exceeds: ASTM F876/F877/F1807/F1960/F2023/F2080/F2155
- Meets ANSI/NSF 61 & 14
- Meets CSA B137.9

Pressure & Temperature

- 160 psi @ 73.4° F (1055 kPa @ 23° C), 100 psi @ 180° F (690 kPa @ 82.2° C), 80 psi @ 200° F (550 kPa @ 93.3° C) Design factor 0.50 (per ASTM F876, CSA B137.5)

Installation

Cut PEX tubing at a 90° angle using a PEX tubing cutter. Clear the cut end of any burrs or debris. **DO NOT expose PEX tubing to direct sunlight.** It is recommended to insulate hot water lines with standard foam polyethylene pipe insulation to prevent heat loss. If installing in an area that experiences harsh winters, it's recommended to insulate both hot and cold water lines to prevent freezing.

Compatible with Uponor (Wirsbo) ProPEX™. (ProPEX™ is a trademark of Uponor [Wirsbo].)

Expansion PEX FITTINGS

Apollo Expansion PEX Fittings (ASTM F-1960) are used for making junctions or directional changes with PEX-A pipe constructed potable water systems.

All Apollo Expansion PEX Fittings comply with the U.S. Safe Water Drinking Act (SDWA) and the 2011 U.S. Reduction of Lead in Drinking Water Act by containing equal to or less than 0.25% lead. The brass fittings are constructed of lead free dezincification resistant (DZR) brass. Poly alloy fittings are constructed of a high density polysulfone alloy.

All Apollo Expansion PEX Fittings have barb ends unless otherwise noted. Apollo Expansion PEX fittings are compatible with Apollo PEX-A pipe and Uponor (Wirsbo) ProPEX™. (ProPEX™ is a trademark of Uponor [Wirsbo].)

Specifications

Use Apollo Expansion PEX Fittings with Apollo PEX-A pipe and fasten to pipe using Apollo Expansion Sleeves with Apollo Expansion PEX Tools. The larger internal diameter of Apollo Expansion PEX fittings results in a 25% greater flow rate within the system. Apollo Expansion PEX fittings can only be used with PEX-A pipe. Follow all instructions included with Apollo tools, fittings, and fasteners.

Approvals

- ASTM F876/F877/F2023/F1960
- ANSI/NSF 61 & 14
- cNSFus-pw
- CSA B137.5
- cUPC

Temperature & Pressure

- Rated 200°F and 200 psi

Installation

1. Cut pipe squarely and place expansion sleeve on end.
2. Insert tool head into tubing and expand (Refer to tool instructions for recommended number of expansions per tubing size).
3. Immediately remove tool and insert fitting end into pipe to shoulder. Pipe may take up to two minutes to fully seal fitting.

Expansion PEX

MANIFOLDS

Apollo Expansion PEX Manifold Systems are available in a wide range of outlet ports. Each manifold system has a galvanized back plate for easy mounting to any structure. The cover plate, for labeling purposes, is constructed of 1/4 in. ABS. All are bolted to the back plate, rather than screwed. Each manifold system consists of two inlet ports that supply the dual chambers. Typically one inlet is used for cold water supply, and the other inlet is used for hot water supply. However, both inlets may be used for either hot or cold water. The water inlet connections are 1 in. MPT or included 3/4 in. PEX x 1 in. MPT adapters can be used to make the inlets 3/4 in. PEX-A Barb. The outlets are 1/2 in. MPT. 1/2 in. FPT Swivel x PEX-A Barb valves are included.

Each manifold system is individually boxed, and includes red and blue labels for indicating the destination fixtures. Keep the manifold in its carton until ready for installation. Protect the manifold from dust and debris until plumbing system is fully installed.

Specifications

- Save Time and Money - Manifolds allow you to make longer continuous runs of PEX-A pipe, meaning you buy fewer fittings and spend less time installing.
- Fewer Possible Leaks - Longer continuous runs with fewer sleeve connections means fewer chances of leaks and avoiding the possibility of thousands of dollars in water damage.
- Controls Scalding - When plumbed so that each branch line feeds only one fixture, the manifold greatly reduces pressure fluctuations and temperature swings that cause scalding.
- Quiet Plumbing - Longer runs of pipe using fewer fittings means smoother bends and turns which reduces line noise and water hammer.

Installation Caution

- Before and after installation, ensure manifold is kept in a location with limited exposure to chemicals, paint, hazardous materials, debris, excessive heat, direct flame, or moving objects that could cause damage.
- The manifold should be located in an area that will not be covered permanently with sheet rock, plywood, or paneling.
- Manifolds should not be installed or kept in a location exposed to freezing temperatures.
- Do not allow water to freeze in the manifold.
- Care should be taken not to over or under tighten fittings.
- Distribution lines must connect to the connecting valves in a straight line perpendicular to the manifold as to avoid bending stress on the valves.
- Manifolds should be installed per all local and national building/plumbing codes. Where a conflict exists between installation instructions and local requirements, the local codes shall take precedence.
- The installer must also meet all qualifications required by the state and/or local administrative authority administering the provisions of the code where PEX-A piping is installed.

PEX-B PIPE

PEX tubing is cross-linked, high-density polyethylene. It's available in white, red, or blue colors for easy identification of hot and cold water lines. The Apollo PEX tubing listed in the following pages is type PEX-B (PEX-b, PEXb).

PEX tubing is for use in hot and cold potable water distribution systems as well as hydronic radiant heating systems. PEX tubing can also be used in continuously recirculating plumbing systems up to 140° F while maintaining chlorine resistance.

Features

- Tough
- Flexible
- Less expensive than other plumbing materials
- Copper tube size dimensions (CTS)
- Available in white, red, or blue

Standards / Certifications

- PEX 5306 - SDR 9
- cNSFus-pw/rfh
- cUPC
- Meets ASTM F876/F877
- ANSI/NSF Standards 61 & 14
- CSA B137.5

Pressure & Temperature

- 160 psi @ 73° F, 100 psi @ 180° F

Fluid Capacity of Apollo PEX Tubing	
Nominal Size	Gallons/100' of PEX Tubing
3/8"	0.53
1/2"	0.96
3/4"	1.40
1"	3.10

Installation

To cut PEX tubing, use a PEX tubing cutter and cut at a 90° angle. Clear the cut end of any burrs or debris. PEX tubing can be run through holes drilled into the center of studs or by using straps and hangers. Bend supports can be used to make bends and angles instead of having to cut the tubing and use fittings. A variety of barb fittings or push type fittings can be used with PEX tubing.

Do not expose PEX tubing to direct sunlight.

It is recommended to insulate hot water lines with standard foam polyethylene pipe insulation to prevent heat loss. If installing in an area that experiences harsh winters, it's recommended to insulate both hot and cold water lines to prevent freezing.

OXYGEN BARRIER PEX-B PIPE

Oxygen Barrier PEX tubing has been designed to prevent diffusion of oxygen into hydronic radiant heating systems. A layer of polymer is laminated to the outside surface which is highly resistant to the passage of oxygen. Oxygen Barrier PEX tubing is good for hydronic radiant heating, cooling, and snow melting systems using water or water/glycol mix. The tubing may be installed in concrete, gypsum based lightweight concrete, sand, asphalt, in or under wood flooring, or behind wallboard or plaster. Oxygen Barrier PEX tubing may also be used as transfer lines for baseboard heating systems with a maximum operating temperature of 200° F @ 100 psi.

Apollo PEX tubing is type PEX-B (PEX-b, PEXb). The silane method, also called the “moisture cure” method, results in PEX-B. In this method, cross-linking is performed in a secondary post-extrusion process, producing cross-links between a cross-linking agent. The process is accelerated with heat and moisture. The cross-linked bonds are formed through silanol condensation between two grafted vinyltrimethoxysilane (VTMS) units, connecting the polyethylene chains with C-C-Si-O-Si-C-C bridges.¹

Features

- Tough
- Flexible
- Copper tube size dimensions (CTS)

Approvals

- cNSFus-rfh
- ASTM F876/F877
- ASTM D2765
- DIN 4726
- ICBO ER #5287

Pressure & Temperature

- 160 psi @ 73° F, 100 psi @ 180° F

APPOB50034	3/4"	500'	0.875±.004	0.671

Installation

To cut PEX tubing, use a PEX tubing cutter and cut at a 90° angle. Clear the cut end of any burrs or debris. PEX tubing can be run through holes drilled into the center of studs or by using straps and hangers. Oxygen Barrier PEX tubing can also be installed in concrete, gypsum based lightweight concrete, sand, asphalt, in or under wood flooring, or behind wallboard or plaster. Bend supports can be used to make bends and angles instead of having to cut the tubing and use fittings. A variety of barb fittings or push type fittings can be used with PEX tubing.

PEX-B

FITTINGS

Apollo PEX Brass Fittings are used for making junctions or directional changes with PEX pipe constructed potable water systems.

All Apollo PEX Brass Fittings comply with the U.S. Safe Water Drinking Act (SDWA) and the 2011 U.S. Reduction of Lead in Drinking Water Act by containing equal to or less than 0.25% lead.

All Apollo PEX Brass Fittings have barb ends unless otherwise noted. Apollo PEX Brass Fittings can be used with Apollo brand PEX-A or PEX-B pipe.

Specifications:

Use Apollo PEX Fittings with Apollo PEX pipe and fasten to pipe using Apollo Crimp Rings, Apollo Pinch Clamps, or Apollo Crimp Sleeves with Apollo PEX Tools. Follow all instructions included with Apollo tools, fittings, and fasteners.

Approvals:

- ASTM F877, F1807 (Brass Fittings) and F2159 (Poly Alloy Fittings) Conformance - Third Party Certified
- NSF 14 and 61 (Brass Fittings), cNSF[®]us pw-G (Poly Alloy Fittings)
- IAPMO
- CSA B137.5

Installation:

Squarely cut PEX pipe to desired length and remove burrs. Slide crimp ring, pinch clamp or sleeve over end of pipe. Insert fitting into pipe end until it touches the shoulder of the fitting. Pro crimp rings, pro pinch clamps and stainless steel sleeves will stay on the end of the pipe. Position crimp rings or pinch clamps 1/8" - 1/4" from the end of the pipe and over the fitting ribs closes to the end of the fitting. Fasten according to appropriate tool directions. Crimp ring and sleeve connections can be checked with a Go/No-Go Gauge.

Crimp Ring Installation

Pinch Clamp Installation

FASTENERS

Crimp Rings

Apollo Crimp Rings are made from copper materials and can be used with brass or poly alloy PEX fittings. A gauge is provided with Apollo PEX Crimp Tools that can be used to check crimp rings for a proper crimp. Pro crimp rings have a plastic top attached to allow for hands-free fastening and guarantees proper placement of the crimp ring.

Crimp Ring

- Copper material
- Use with brass or poly alloy fittings
- Gauge available to check for proper crimp

Pro Crimp Ring

- Copper material with plastic top
- Use with brass or poly alloy fittings
- Allows for hands free fastening
- Secures crimp ring position on pipe
- Guarantees proper ring placement

Pinch Clamps

Apollo Stainless Steel Pinch Clamps can be used with brass or poly alloy PEX fittings. One Pinch Clamp Tool can clamp several sizes of pinch clamps. Pro pinch clamps have a plastic piece attached to allow for hands-free fastening and guarantees proper placement of the pinch clamp.

Pinch Clamp

- Stainless Steel material
- Use with brass or poly alloy fittings
- One tool can clamp several ring sizes
- Reduced equipment cost

Pro Pinch Clamp

- Stainless Steel material with plastic tab
- Use with brass or poly alloy fittings
- One tool can clamp several ring sizes
- Allows for hands free fastening
- Secures crimp ring position on pipe
- Guarantees proper ring placement

Sleeves

Apollo Stainless Steel Sleeves are made from corrosion proof 304 stainless steel and designed with a pipe depth indicator to ensure a secure connection. They are double crimped once installed for the strongest, most reliable fastening method available, as well as offering a neat, clean appearance.

- Stainless Steel material
- One tool can clamp 1/2" or 3/4" sleeves
- Secures crimp sleeve position on pipe

- Use with brass or poly alloy fittings
- Reduced equipment cost
- ASTM F876, NSF 14 and 61 approvals

Pipe Hangers

Plastic pipe hangers are recommended for use with Apollo PEX tubing. To prevent noise transfer, only use hangers that keep the tube off of the nailing surface. Hangers should be used every 32 in. on horizontal runs and every 4 ft. on vertical runs. Allow the tube to dip between hangers and never over tighten. To prevent stress on the crimp joints, always support tubing before and after the fitting.

Pipe Bends

Do not bend tube too tightly. The minimum recommended bend radius is six times the tube size (i.e. 1/2 in. tube = 3 in. bend radius). When making a 90° turn, use bend supports.

APOLLO PEX

MANIFOLDS

Apollo PEX Manifold Systems are available in a wide range of outlet ports. Each manifold system has a galvanized back plate for easy mounting to any structure. The cover plate, for labeling purposes, is constructed of 1/4" ABS. All are bolted to the back plate, rather than screwed. Each manifold system consists of two inlet ports that supply the dual chambers. Typically one inlet is used for cold water supply, and the other inlet is used for hot water supply. However, both inlets may be used for either hot or cold water. The water inlet connections are 1 in. MPT or included 3/4 in. PEX-B Barb x 1 in. MPT adapters can be used to make the inlets 3/4 in. PEX-B Barb. The outlets are 1/2 in. MPT. 1/2 in. FPT Swivel x PEX-B Barb valves are included.

Each manifold system is individually boxed, and includes red and blue labels for indicating the destination fixtures. Keep the manifold in it's carton until ready for installation. Protect the manifold from dust and debris until plumbing system is fully installed.

Specifications

- Save Time and Money - Manifolds allow you to make longer continuous runs of PEX pipe, meaning you buy fewer fittings and spend less time installing.
- Fewer Possible Leaks - Longer continuous runs with fewer crimp connections means fewer chances of leaks and avoiding the possibility of thousands of dollars in water damage.
- Controls Scalding - When plumbed so that each branch line feeds only one fixture, the manifold greatly reduces pressure fluctuations and temperature swings that cause scalding.
- Quiet Plumbing - Longer runs of pipe using fewer fittings means smoother bends and turns which reduces line noise and water hammer.

Installation Caution

- Before and after installation, ensure manifold is kept in a location with limited exposure to chemicals, paint, hazardous materials, debris, excessive heat, direct flame, or moving objects that could cause damage.
- The manifold should be located in an area that will not be covered permanently with sheet rock, plywood, or paneling.
- Manifolds should not be installed or kept in a location exposed to freezing temperatures.
- Do not allow water to freeze in the manifold.
- Care should be taken not to over or under tighten fittings.
- Distribution lines must connect to the connecting valves in a straight line perpendicular to the manifold as to avoid bending stress on the valves.
- Manifolds should be installed per all local and national building/plumbing codes. Where a conflict exists between installation instructions and local requirements, the local codes shall take precedence.
- The installer must also meet all qualifications required by the state and/or local administrative authority administering the provisions of the code where PEX piping is installed.

Tectite by Mosack Group

PUSH-TO-CONNECT FITTINGS

Tectite by Mosack Group Push-To-Connect fittings are the fastest, cleanest and simplest way to join any combination of copper, CPVC, PE-RT and PEX pipe without the use of tools, solder, open flame or glue.

Simply insert the pipe to allow the high-strength stainless steel teeth to grip the pipe securely against the specially designed O-ring. Fitting removal and reuse is just as simple using a simple demount clip (sold separately). After assembly, fittings may be rotated for simpler installation in tight spaces.

All Tectite by Mosack Group fittings are approved for use in both potable water and hydronic heating piping systems.

FEATURES

- Constructed of lead free dezincification resistant (DZR) brass for superior reliability
- Push-to-connect joints require no heat, solder, solvents or tools
- Push-to-connect design allows for a simple and fast installation on any combination of copper, PEX, CPVC or PE-RT pipe
- Corrosion resistant for greater longevity
- Lifetime warranty on most fittings. Refer to Apollo Warranty on www.apolloflow.com for item specific information.

PERFORMANCE RATING

- Maximum Working Pressure: 200 psi
- Temperature Range: 32°-250° F
- Approved for behind-the-wall with no access and burial
- Ideal for potable water and hydronic heating applications

APPROVALS

- NSF/ANSI NSF 61/372/14
- ASSE 1061
- IAPMO cUPC® File Listings: 4951

Instructions

Squarely cut the pipe to desired length. Mark the insertion depth using the depth gauge. Push pipe and twist into the fitting until the fitting edge meets the depth line.

Fitting removal and reuse is just as simple using a demount clip. After assembly, fittings may be rotated for simpler installation in tight spaces.

Cut pipe.

Mark insertion depth using the depth gauge (sold separately).

Push pipe (A) and twist (B) into fitting until fitting edge meets depth line.

Removal tool (sold separately).

Place tool around pipe next to fitting. Press tool toward fitting while pulling pipe from fitting.

Push-To-Connect

ELECTRICAL FITTINGS

Tectite Electrical is an industry-first range of UL-approved Push-To-Connect fittings for non-metallic flexible conduit. Installation is easy - simply push the fitting onto non-metallic flexible conduit. The result is a functionally superior and water-tight seal. It's non-metallic and this provides extra safety through assured grounding and the smooth interior walls make pulling wire easy, even around tight corners. The installation of type B non-metallic conduit to weatherproof outlet boxes, pool/spa equipment, central air conditioning units, and various other electrical enclosures or hubs just got tremendously easier with Tectite Electrical. Tectite Electrical fittings are available in 1/2 in., 3/4 in., and 1 in. sizes in male adapter and male elbow configurations.

Features:

- Fast, clean and simple installation using push to connect technology
- Includes nut and integrated EPDM seal
- Requires no solvents or tools for installation or removal
- Approved for direct burial
- Removable and reusable
- Corrosion-proof for longevity

Specifications & Approvals:

- CSA
- UL

Installation Instructions:

Squarely cut the conduit to desired length. Mark the insertion depth using the depth gauge on the packaging. Insert conduit and twist into the fitting until the fitting edge meets the depth line. After assembly, fittings may be rotated for simpler installation in tight spaces.

COPPER PRESS FITTINGS

Copper Press Fittings are NSF listed, lead free and feature an EPDM O-ring to ensure a clean, leak-free seal. Utilizing a hydraulic press tool, a watertight seal can be made in seconds without flame, solder, or flux. Each press fitting comes standard with leak-before-press technology to easily identify a fitting that has not been pressed. Connection can be made in wet conditions reducing project downtime. These fittings are available in sizes from 1/2 in. to 1 in. and are compatible with all major hydraulic press tools.

Features:

- Leak-Before-Press Technology.
- No solder necessary for installation.
- Flameless press technology eliminates need for burn permits.
- Dezincification resistant.
- Suitable for underground installation.

Specifications:

- Operating pressure: 300 psi CWP
- Temperature range: 32°F - 250°F

Approvals:

- NSF
- IAPMO

Installation:

Cut type K, L, or M hard copper tube squarely using a rotary tube cutter. Remove burrs to ensure tube end is smooth and clean to avoid damaging the O-ring. Identify the depth, using the Depth Chart, and measure the tube from the end, marking it clearly on the exterior of the tube. This ensures a proper seal of fittings and tube. While turning the tube slightly, slide the press fitting to the marked depth. Press the joint.

VALVES

The **94ALF Lead Free Forged Brass Ball Valve** combines reliable operation with maximum economy. The 94ALF-A is ideal for gas, fuels, fire protection and general plumbing and HVAC applications including potable water.

The **Lead Free Pressure Reducing Valve** is designed to conserve water and protect water distribution systems by automatically reducing elevated supply pressures. The dezincification resistant bronze body, stainless steel adjusting screw and dielectric polymer cage provide maximum corrosion resistance. Designed for easy in-line servicing with simple cartridge removal.

**LEAD FREE: The wetted surfaces of this product shall contain no more than 0.25% lead by weighted average. Complies with Federal Public Law 111-380. ANSI 3rd party approved and listed.*

94ALF Approvals

- MSS SP-110 - Ball Valves
- NSF/ANSI 61 Water Quality

Irrigation Fittings

BLUE INSERTS

The self-threading Double Helix® design of these blue irrigation insert fittings provides effortless insertion into Polyethylene (PE) pipe. No longer is there a need to hammer or walk them into the pipe. Just turn the fitting clockwise into the pipe and let the Double Helix® pull the pipe onto the fitting.

Once the pipe has covered all of the barbs you are assured a connection that does not leak and will withstand the water pressure of your installation. For a more secure installation, please fasten fittings to pipe with poly pipe pinch clamps.

FEATURES

- Easy installation without tools.
- 100% corrosion resistant.
- Suitable for underground applications.
- No restriction on number of connections.

SPECIFICATIONS

- 160 psi @ 73° F
- Made from Polyphenylsulfone (PPSU) plastic.
- For use with Polyethylene (PE) pipe.
- For use with cold water applications only.

APPROVALS

- ASTM D-2609
- NSF 61 for potable water
- ANSI/NSF 14 & 7

Irrigation Fittings

BRASS INSERTS

Brass Insert Fittings are most commonly used in irrigation systems. They are also used for cold water sprinkler and pump installation applications. They feature 100 psi maximum working pressure. Please secure fittings to pipe with poly pipe pinch clamps.

Brass Insert Features

- Lead-free DZR brass construction.
- Use with polyethylene pipe.
- Use PTFE tape on threaded connections.
- Install with Apollo Poly Pipe Pinch Clamps.

Brass Insert Approvals

- NSF/ANSI 372
- NSF/ANSI 61-8

Snapport®

Add an outlet to any vessel from the outside! Easily install an outlet to a bucket, trough, drum, or rain barrel in less than a minute. Snapport® allows for total drainage of fluid when installed vertically. Install on any rigid material 1/16 in. to 3/8 in. thick. Requires a 1 1/8 in. hole. Once installed, a 1 in. SW pipe valve or plug can be attached.

Scan the QR code for a video on how to install Snapport™.

SPRINT

Irrigation Fittings

SPRINT

Sprint fittings are push to connect fittings for Polyethylene pipe in irrigation applications. The are removable and reusable, making installation very easy.

Features

- 100% corrosion resistant
- Push to connect solution without special tools
- Install regardless of temperature or weather
- Approved for burial
- Removable and reusable
- 5-year warranty

Specifications

- For use with 100 psi Polyethylene (PE) pipe
- Working pressure: up to 230 psi (16 bar)
- Temperature: -4° F to 104° F
- Made from glass-fiber reinforced PA

Installation Instructions

Squarely cut PE pipe to desired length. Mark pipe depth using guide on packaging. Insert pipe into fitting with a twisting motion. Check connections after installation. To remove, open the sleeve by using a wrench and turn the cap counter clockwise. Remove the pipe. Remove the fitting components from pipe and reassemble fitting.

CPVC FITTINGS

CPVC pipe and fittings are used in corrosive resistant applications. CPVC resists mineral buildup and corrosion. Solvent weld joints provide easy installation.

Features:

- Solvent weld installation to CPVC pipe.
- CPVC systems are accepted by all major building codes.
- Resistant to mineral buildup and corrosion.
- Easy installation with solvent cement.

Specifications:

- 180 psi @ 73° F
- For use with CPVC pipe.
- Made from chlorinated polyvinyl chloride.
- For use with hot and cold water applications.

Approvals:

- ASTM D-2846
- ANSI/NSF 61

PVC FITTINGS

Telescoping PVC slide repair couplings by Apollo are adjustable to assist in making easy repairs to damaged pipes. The telescoping action allows the fitting to expand or retract to cover/replace the damaged section of existing pipe. Simply remove the damaged section of pipe, clean pipe and fitting ends thoroughly, apply solvent cement and secure into place. Once secured, these fittings will provide years of reliable service.

Compression fittings by Apollo are engineered to perform to strict standards and expectations. With a duplex seal that ensures a leak-proof seal in every application and a large gripping area, these fittings resist even the strongest of longitudinal pull out forces. Available in coupling, adapter, union and female compression tees, PVC compression fittings by Apollo are designed for years of reliable use.

Apollo PVC Schedule 40 Ball Valves are compact and lightweight. This Slip x Slip valve is designed for a variety of applications including pressure distribution of cold water in irrigation, pool, spa, agricultural, commercial and light industrial applications and comes in a plastic jar which is convenient, resealable, and reusable. Apollo PVC Sch. 40 ball valves are NSF approved and have EPDM seats and O-rings integrated into the durable PVC body. The full port valve design allows for maximum flow rates with minimal turbulence or pressure reduction.

Features:

- For use in repairs of irrigation lines and cold-water distribution PVC water lines.
- Pipe must be restrained during and after installation.
- Corrosion resistant.
- For use in irrigation, underground sprinkler systems, swimming pools, outdoor applications and cold water supply lines.

Specifications:

- Maximum operating pressure: 150 psi at 73°F
- Working temperature range: 41°F - 140°F

Approvals:

- Conforms to NSF 61/372, ASTM D-1784, D-2466, F-1970 and D-2000
- NSF Certified
- NSF / ANSI Standard 372 Certified for ball valves
- Slip connections conform to ASTM D2468 for ball valves

PVC Correction Factors

Operating Temperature (°F)	PVC Factor
73° F	1.00
80° F	0.88
90° F	0.75
100° F	0.62
110° F	0.51
115° F	0.45
120° F	0.40
130° F	0.31
140° F	0.22

The pipe pressure ratings shown are the maximum allowable working pressure for water, non-shock, at 73°F. Allowable pressure ratings decrease with an increase in temperature. The following temperature de-rating factors must be applied to the working pressure ratings shown to determine the maximum allowable pressure rating at elevated temperatures. Multiply the working pressure rating shown at 73°F by the appropriate de-rating factor for the elevated temperature selected to determine the maximum allowable pressure rating at that temperature.

Example: 4" Sch 40 PVC pipe = 220 psi@73°F
4" Sch 40 PVC pipe (220 psi x 0.51) = 112 psi

*The maximum allowable operating temperature for PVC is 140°F

Stainless Steel Adjustable Clamps

Our Stainless Steel Adjustable Clamps are made from corrosion resistant 300 stainless steel. Clamps are used in securing hoses, pipe, cable, tube, fuel lines etc. They are good for indoor and outdoor plumbing, home, auto, marine, and light industrial applications. They are great for underground and plumbing applications where corrosion resistance is necessary.

Features:

- Ideal for securely clamping tubes in place.
- Resists corrosion and rust.
- Clean punch and rectangular perforations hold strong and connect easily.
- Easy to tighten or loosen with a screwdriver for easy installation.
- IAPMO Research and Testing certified.

WARRANTY

Subject to the conditions and limitations in this Limited Warranty, The Mosack Group, Inc. warrants to the owner of applicable real property in the United States (including its territories) and Canada that Apollo products, when properly installed in potable water piping systems and hydronic heating piping systems, under normal conditions of use, shall be free from failure caused by manufacturing defects for the applicable Warranty Period. This Limited Warranty is in effect for installations made after January 1, 2017 and applies strictly to products installed in the country which they were purchased.

Validation of the Warranty Period is required through proof of purchase. In the event that proof of purchase is unavailable, the Warranty Period initiation date shall default to the date of manufacture for each product. If the product suspected of a defect does not have a visible date of manufacture, a proof of purchase shall be required.

All products must be installed in accordance with all then applicable codes, good plumbing practice, in accordance with any local, state, provincial or federal requirements, and installed in a potable water or radiant heating application unless a non-potable water service is specifically described in published pertinent product literature.

The installer must use construction techniques compliant with then applicable codes to install the product and use the product within the design parameters specified in any installation guidelines and technical notes for the applicable system. This shall include field pressure testing prior to concealing with concrete or by other means and wrapping any brass fitting when buried. Failure to install Apollo products according to manufacturer's installation instructions will void all applicable warranties and may result in severe water damage.

Products must at all times be used in a manner consistent with their intended use and be used in installations and environments acceptable to their material and design specifications, including not being installed in a system that may operate at temperatures or at pressures that exceed the approved ratings which can be found on the product, packaging or installation instructions.

Product specific conditions of this Limited Warranty and the Warranty Period are detailed in the table entitled "Additional Product Specific Warranty Information".

Without limiting the foregoing, this Limited Warranty does not apply and you do not have a right of reimbursement if the product failure or resulting damage is caused by: (a) evidence of tampering, mishandling, neglect, abuse, accidental damage, freeze damage (it is expressly understood that failure as a result of any freezing fluids within the pipes does not constitute a defect in material or workmanship and shall not be covered by this warranty) or unauthorized modifications or repairs that cause damage to warranted products; (b) exposure to harmful, unauthorized, or unanticipated chemicals or substances or corrosive water conditions; (c) exposure to ultraviolet light; (d) faulty installation including failure to follow proper burial instructions; (e) damage from abnormal operating conditions including exposure pressures and temperatures beyond the specified operating range; (f) failure to properly test and pass common testing methods (including pressure testing) after the installation and before the product or system is put in service; (g) components not manufactured or sold by The Mosack Group, Inc.; or (h) acts of nature such as earthquakes, re, flood or lightning.

Although The Mosack Group, Inc. provides a plumbing system to facilitate a complete installation, other manufacturers pipe and/or fittings may be installed in any given installation provided manufacturing of the pipe and/or fittings demonstrates compliance with the applicable ASTM/CSA standards, and the product has been certified by a recognized third-party testing agency. The Mosack Group, Inc. product in the given installation will continue to be covered under this Limited Warranty although limits on Warranty Period may apply. The Mosack Group, Inc. will be responsible only for proven defects in material or workmanship in The Mosack Group, Inc. products. Problems in products manufactured by another company should be reported to that manufacturer.

In order to be eligible for service under this Limited Warranty, it is the responsibility of the property owner to obtain and pay for repairs. Only if the warranty applies will The Mosack Group, Inc. be responsible for reimbursement under this warranty. The part or parts which you claim failed should be kept and The Mosack Group, Inc. contacted at the address below or by telephoning within thirty (30) days after the failure or leak and identifying yourself as having a warranty claim. You should be prepared to ship, at your expense, the product which you claim failed due to a manufacturing defect (including the original section of pipe still inserted), document the date of installation, proof of purchase, and the amount of any claimed bills for which you seek reimbursement. Products returned without shipping charges prepaid will be refused. Within a reasonable time after receiving the product, The Mosack Group, Inc. will investigate the reasons for the failure, which includes the right to inspect the product at The Mosack Group, Inc. and reasonable access to the site of damage in order to determine whether the warranty applies. The Mosack Group, Inc. will notify you of the results of this review. For questions or inquiries, call 1(888)229-2874.

In the event that The Mosack Group, Inc. determines that the failure or leak and any resulting damages were the result of a manufacturing defect in the products covered by limited warranties outlined below, The Mosack Group, Inc. will reimburse the property owner for reasonable repair or replacement charges to include drywall, flooring and painting costs, as well as damages to personal property, resulting from the failure or leak. Except as specified above or otherwise specifically authorized in writing by The Mosack Group, Inc., The Mosack Group, Inc. shall not pay for any costs or expenses for transportation, relocation, labor, repairs or any other work associated with removing and/or returning failed or defective products or installing replacement products. Any change in property ownership after the first ten years will nullify any remaining warranty coverage. This shall constitute the sole and exclusive remedy for any defective product.

The Mosack Group, Inc. shall not be responsible for any other incidental, indirect, contingent, special or consequential damages, including without limitation, economic loss, lost profits or the cost of repairing or replacing other property which is damaged if these warranted products do not work properly, other costs resulting from labor charges, delays, vandalism, negligence, fouling caused by foreign material, damage from adverse water conditions, adverse chemical environments, or any other circumstances over which The Mosack Group, Inc. has no control. This limitation applies even if The Mosack Group, Inc. could have foreseen or has been advised of the possibility of these damages. This Limited Warranty shall be invalidated by any abuse, misuse, misapplication or improper installation of the product. Any remaining warranty coverage may not be assigned or transferred after the period ending ten years following the installation. The Mosack Group, Inc. does not guarantee or in any way warrant the integrity or workmanship of the contractor/installer.

Other than this limited warranty, The Mosack Group, Inc. does not authorize any person or firm to create for it any other obligation or liability in connection with its products. This written warranty applies for the first 10 years of the applicable warranty regardless of any change of ownership in the property. Some states do not allow the exclusion or limitation of incidental or consequential damages or limitations on the duration of implied warranties in certain types of transactions, so the above exclusion or limitations may not apply to you.

LIMITATION OF LIABILITY: THE MOSACK GROUP, INC. SHALL NOT UNDER ANY CIRCUMSTANCES BE LIABLE FOR SPECIAL OR CONSEQUENTIAL DAMAGES SUCH AS, BUT NOT LIMITED TO, DAMAGES OR TO LOSS OF OTHER PROPERTY OR EQUIPMENT, LOSS OF PROFITS OR REVENUE, COST OF CAPITAL, COST OF PURCHASED OR REPLACEMENT GOODS, OR CLAIMS OF CUSTOMERS OF OUR INITIAL PURCHASER. THE REMEDIES OF OUR INITIAL PURCHASER, AND ALL OTHERS, SET FORTH HEREIN, ARE EXCLUSIVE, AND THE LIABILITY OF THE MOSACK GROUP, INC. WITH RESPECT TO SAME SHALL NOT, EXCEPT AS EXPRESSLY PROVIDED HEREIN, EXCEED THE PRICE OF THE GOODS UPON WHICH SUCH LIABILITY IS BASED.

This Limited Warranty and any claims arising from breach of contract, breach of warranty, tort, or any other claim arising from sale or use of The Mosack Group, Inc. products shall be governed and construed under the laws of the State of North Carolina. No action on the part of The Mosack Group, Inc. under this Limited Warranty shall be construed as an admission of liability of that the product is not for its intended use.

ADDITIONAL PRODUCT SPECIFIC WARRANTY INFORMATION

Product Group	Limited Warranty Period	Conditions
Apollo by Mosack Group or Apollo TMG	5 Years	Must be installed per published installation instructions.
Apollo by Mosack Group CPVC Fittings	5 Years	From date of purchase and when used in accordance with instructions.
Apollo Expansion PEX Fittings (PEX-A)	25 Years	For exclusive use with PEX-A pipe.
Apollo Expansion PEX Pipe (PEX-A)	25 Years	For exclusive use with ASTM F1960 fittings.
Apollo PEX Brass Fittings & Copper Manifolds (PEX-B)	25 Years	For exclusive use with: PEX - ASTM F876/CSA B137.5 Copper Crimp Rings - ASTM F1807 Stainless Steel Pinch Clamps & Sleeves - ASTM F2098
Apollo PEX Pipe & Oxygen Barrier Pipe (PEX-B)	25 Years	For use with ASTM F2159 fittings.
Apollo PEX Poly Alloy Fittings (PEX-B)	25 Years	For exclusive use with: PEX - ASTM F876/CSA B137.5 Copper Crimp Rings - ASTM F2159 Stainless Steel Pinch Clamps & Sleeves - ASTM F2098
Apollo PEX Tools Expansion (PEX-A) and Crimp & Clamp (PEX-B)	5 Years	From date of purchase and when used in accordance with instructions.
Apollo by Mosack Group Press Fittings	50 Years	From date of purchase and when used in accordance with instructions.
Apollo by Mosack Group Valves	5 Years	Must be installed per published installation instructions.
Apollo by Mosack Group Blue Insert Fittings	5 Years	Must be installed per published installation instructions.
Sprint	5 Years	Must be installed per published installation instructions.
Tectite by Mosack Group Accessories (Connectors, supply stops, appliance outlet boxes, kits, manifolds, hoses, etc.)	5 Years	Must be installed per published installation instructions.
Tectite by Mosack Group Push-To-Connect Fittings	Lifetime	For exclusive use with: PEX - ASTM F876/CSA B137.5 Copper - ASTM B 88 hard drawn copper tube K, L, & M CPVC - ASTM D2846 or CSA B137.6 PE-RT - ASTM F2769
Tectite by Mosack Group Push-To-Connect Fittings in HDPE Applications	5 Years	For exclusive use with HDPE SDR-9 ASTM D2737.
Tectite by Mosack Group Tools	5 Years	From date of purchase and when used in accordance with instructions.
Tectite by Mosack Group Valves	5 Years	Must be installed per published installation instructions.
Tectite Electrical by TMG	25 Years	From date of purchase and when used in accordance with instructions.

TERMS AND CONDITIONS OF PURCHASE

1. Seller's acceptance of the offer represented by this purchase order issued by The Mosack Group, Inc., is expressly limited and subject to these Terms and Conditions, irrespective of any other terms or conditions proposed by Seller. Any such terms or conditions proposed by Seller are hereby rejected by The Mosack Group, Inc., and shall be void and unenforceable.
2. Delivery in whole or in part of the goods to be furnished hereunder shall constitute acceptance of this order, subject to these Terms and Conditions. This is the entire contract between The Mosack Group Inc. and Seller concerning the subject hereof, and no changes of any kind whatsoever are binding on The Mosack Group Inc. unless they are in writing and signed by an authorized representative of The Mosack Group Inc..
3. Seller must provide the goods as indicated on this purchase order and/or therein designated documents. Seller shall not substitute any materials without The Mosack Group Inc.'s written consent. Seller shall indicate The Mosack Group Inc. purchase order number on the shipping documents, which shall indicate Seller's full compliance with the requirements of this order and therein designated documents.
4. When partial shipments are made for the convenience of Seller, additional transportation costs shall be paid entirely by Seller. Any partial or early shipment must be agreed to in writing by The Mosack Group Inc.
5. Blanket orders are subject to firm pricing, to be released over one year from date of first receipt of goods, unless otherwise agreed to in writing by The Mosack Group Inc.
6. Do not execute this order at higher pricing than shown, or previously charged without our written consent.
7. Seller shall deliver the goods to The Mosack Group Inc. on the date(s) indicated in this purchase order. If Seller fails to make delivery of any part of the goods on the date(s) indicated, The Mosack Group Inc. may terminate the purchase order and have no further obligation hereunder, and pursue all other available remedies.
8. All tooling shall remain the property of The Mosack Group Inc., and subject to return upon The Mosack Group Inc.'s request, without additional charge.
9. Seller agrees to comply with all local, state and federal laws, regulations and orders pertaining to the fulfillment of this purchase order, including without limitation, all such laws and regulations regarding equal employment nondiscrimination and affirmative action, if any, specifically including but not limited to the provision of Title VII of the Civil Rights Act of 1964, Executive order 11246 Section 503 of the Rehabilitation Act of 1973, Section 402 of the Vietnam Era Veterans Readjustment Assistance Act, The Toxic Substance Control Act, The Occupational Safety and Health Act, The National Labor Relations Act, The Immigration Reform and Control Act and all binding rules, regulations and relevant orders of any regulatory bodies issued pursuant to any of the above.
10. Seller agrees to indemnify, defend and hold harmless The Mosack Group, Inc. and its successors and assigns from and against any and all claims, demands, liabilities, costs, suits or actions, including all reasonable expenses, attorney fees, lost profits, consequential damages or any other type of damage, including without limitation, injuries to or the death of any person and loss of or damage to any property, including the property of The Mosack Group, Inc. (collectively, "Losses"), alleged to have been caused, in whole or in part, by or resulting from the goods and/or services covered by this purchase order or any breach hereof, or negligence of Seller or its employees, agents, or subcontractors. Without limiting the generality of the foregoing, Seller agrees to indemnify, defend and hold harmless The Mosack Group, Inc. and its successors and assigns from and against any and all Losses arising from or otherwise related to any actual or alleged infringement of any intellectual property rights, including without limitation, patent and trademark rights.
11. All purchase orders, including The Mosack Group, Inc. Terms and Conditions, transmitted electronically constitute binding contracts and are deemed to be the equivalent of written and signed documents.
12. Any and all disputes arising from or otherwise related to this purchase order or these Terms and Conditions shall be resolved exclusively through binding arbitration under the Rules of Arbitration of the International Chamber of Commerce by one or more arbitrators appointed in accordance with said Rules. The place of arbitration shall be Charlotte, North Carolina, USA. The arbitration shall be conducted entirely in English.
13. This purchase order and these Terms and Conditions shall be governed by the law of North Carolina, USA.
